***Allowable Subject Matter***

1. The following is an examiner's statement of reasons for allowance: The prior art of record does not teach a current digital to analog converter that comprises, inter alia, a first bias current that is coupled to adjust an amount of current supplied to a first node, a second bias current that is coupled to adjust an amount of current supplied to a second node; the bias currents and the nodes, are associated with first and second operational amplifiers (control circuits) that control the nodes that are further coupled to a current mirror circuit in such a way to make the voltage at the node substantially equal to the reference voltage supplied to the operational amplifiers; the converter further comprises a first circuit that adds a current supplied from an input terminal and a first bias current and for mirroring the added current and a second circuit that adjusts the amount of the mirrored current by a second bias circuit.

2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Peguy JeanPierre whose telephone number is (571) 272-1803. The examiner fax phone number is (571) 273-1803.
